## NUCLEAR REGULATORY COMMISSION

### Call for Nominations for Nuclear Safety Research Review Committee

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Call for nominations.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is inviting nominations of qualified candidates to consider for appointment to fill three anticipated vacancies on its Nuclear Safety Research Review Committee (NSRRC). Nominations will be accepted till June 16, 1995.

**ADDRESSES:** Submit nominations to: Ms. Jude Himmelberg, Office of Personnel, U.S. Nuclear Regulatory Commission, Washington DC 20555.

**FOR FURTHER INFORMATION CONTACT:** Mr. George Sege, Designated Federal Officer for the NSRRC, U.S. Nuclear Regulatory Commission, Washington, DC 20555; telephone: 301-415-6593.

**SUPPLEMENTARY INFORMATION:** The Committee advises the Director of the NRC's Office of Nuclear Research—and through him the Commission—on the quality and conduct of NRC research activities and makes recommendations concerning the overall management and direction of the nuclear safety research program.

The 12-member Committee is composed of senior experts in nuclear

engineering or science capable of providing technical advice on the broad range of topics that are the subject of nuclear safety research for nuclear power plants and other facilities. Maintaining balance and diversity of experience, knowledge, and judgment is an important consideration in the selection of members. Committee members serve a two-year term and may be reappointed for up to two additional two-year terms.

Over the next two years, the Committee will be examining such issues as the quality of nuclear safety research relative to the needs of the users of the research products, the long-range direction of the nuclear safety research programs, the peer review process of research products and the capability of individuals and facilities where nuclear safety research is conducted.

In order to maintain a good balance of capabilities on the Committee, candidates should have expertise in nuclear engineering and nuclear safety, with emphasis on demonstrated capabilities in major portions of one of the following two areas.

- Advanced instrumentation and controls and human factors, including human-system interfaces.
- Broad experience in design and operation of nuclear power plants, nuclear engineering, and research related to nuclear power plants.

Selection for membership will be based on demonstrated capability and professional accomplishment in the indicated area of specialization, in the conduct or management of scientific or engineering research and in applying research to nuclear safety issues.

Nominations for membership must include a résumé describing the educational and professional qualifications of the nominee and the nominee's current address and daytime telephone number. Nominees must be U.S. citizens and be able to devote about 80 hours per year to Committee business.

Dated at Rockville, MD, this 2nd day of May 1995.

For the Nuclear Regulatory Commission.

**Andrew L. Bates,**

*Advisory Committee Management Officer.*
